Reduce our own Environmental Footprint

- 1st North American Bank to be carbon neutral
- Reduced our energy use
- A North American leader in purchaser of green energy
- Carbon Offset Credits through investments with Social Partners

Environmental responsibility isn't just our policy, it's our promise.

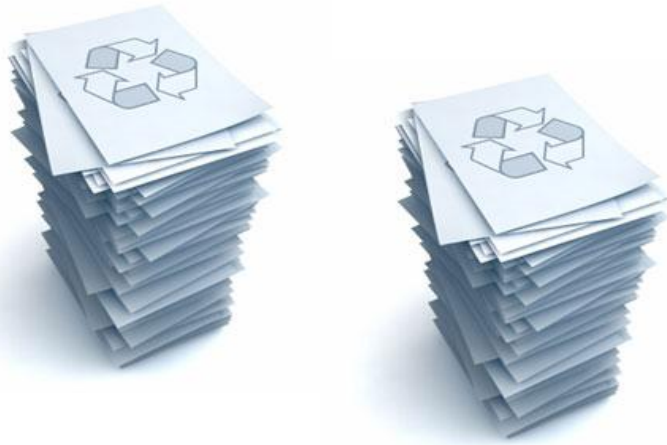

TD is committed to becoming a truly green bank.

The actions we take to preserve the environment are the marks we leave for future generations. Almost 20 years ago, we created the TD Friends of the Environment Foundation. Today, it funds over 18,000 grassroots environmental projects at the community level. And we continue to look for new and innovative ways to create carbon offset programs with not-for-profit organizations. In addition to being one of the largest corporate purchasers of renewable energy in Canada, we're proud to be the first bank in Canada to commit to becoming carbon neutral. We continue to strive to become a greener bank – one that is contributing to a better tomorrow.

Reducing our own Environmental Footprint

- 1st Canadian company to participate in North American closed-loop paper recycling system
- No office paper or e-waste goes to landfill
- Saving 43,000 trees and 300 million pieces of paper each year

Creating a Carbon Forest

- Partnered with Munsee-Delaware Nation and Tree Canada to bring the very first carbon forest to First Nations land
- 77,000 fast-growing hybrid poplar trees planted on abandoned farmland near London
- Trees remove 20,000 tonnes of carbon dioxide from the air

Greener Choices for Customers Product and Services

- Customers have helped save over 6,000 trees by signing up for Paperless Recordkeeping

**Save time and trees!
